

PRESS RELEASE

|| Sunesys and Pavlov Media Form Partnership for Increased, High-Bandwidth Network Connectivity in Georgia ||

March 23, 2015 (Warrington, PA) – [Sunesys, LLC](#), a premium telecom service provider of Private Line Ethernet, Dark Fiber, Wavelength and IP solutions, has formed a partnership with [Pavlov Media](#) to bring increased connectivity solutions into Georgia-based MDUs (multi-dwelling units). Headquartered out of Illinois, Pavlov Media is the largest private provider of broadband services in the MDU (multi-dwelling unit) space offering Internet and cable television to hundreds of apartments, condos and student housing sites across the nation.

Recently, Sunesys installed a SunEP Managed Private Ethernet solution for Pavlov Media in order to expand bandwidth offerings for their end users. The SunEP 1 Gbps solution connects a Kennesaw-based housing location back to the 56 Marietta data center location in Atlanta, GA. The 100% dedicated, private network allows Sunesys to offer a unique solution to Pavlov Media, which ultimately allows them to better service the needs of their customers and provide increased connectivity beyond the scope of a traditional provider. The 1 Gig WAN solution is backed by a secure network which passes through no public Central Offices, switches or routers and affords a solution that is both reliable and scalable to help build a positive tenant experience on the front end.

Mark Scifres, CEO of Pavlov Media on the connection: "As a leader in the MDU broadband arena, we continue to push the boundaries of bandwidth to well surpass the needs and expectations of our customers. We strive to make the fastest networks available and through state-of-the-art products such as our Tesseractiv™ content delivery network, we are succeeding. The high-bandwidth fiber connectivity that the Sunesys solution provides is yet another piece to the larger puzzle of building a national Internet backbone presence, supporting 1 Gbps and beyond, that maximizes our customer experience."

Patrick Minogue, Business Development Manager of Carrier Sales continues, "We are excited about the partnership with Pavlov Media. As Sunesys continues to expand our metro footprint as well as provide interregional connectivity through our SunTran network, partnerships with premier enterprises such as Pavlov Media allow us to expand our footprint and ultimately service the needs of thousands of customers worldwide. For carrier network providers seeking dedicated, high-speed connectivity, Sunesys offers an ideal foundation to transport IP offerings at limitless bandwidth, ensuring best-in-class service with a cohesive end-user experience."

Sunesys, headquartered in Pennsylvania, currently operates over 9,000 fiber route miles in ten states across the country. Sunesys' entire footprint can be viewed online at www.sunesys.com/network-maps/ or by downloading the Sunesys App, available for [iPhone](#) and [Android](#) devices.

About Sunesys, LLC

Sunesys is a leading provider of premium bandwidth services and private fiber optic networks.
